DETAILED ACTION

Acknowledgments

1. Acknowledgment is made of the request for reconsideration filed 6/27/03.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Phung et al. (6,370,469 B1) and in further view of Blaney (4,522,280 A).

Phung et al. discloses a microcontroller system 104 for altering the condition of a cruise control system 100 for a motorized vehicle when the vehicle experiences lateral acceleration in excess of a threshold value, said lateral acceleration being determined by a sensor (or accelerometer) 106, as recited in column 1, lines 11-47. Phung et al. does not disclose the control system as disengaging the cruise control based on the sensed value exceeding the threshold value. Blaney does disclose a control device for disengaging a cruise control in response to a sensed value exceeding a threshold value, as recited in column 2, lines 65-69. It would have been to one having ordinary skill in the art at the time of the invention to have provided the control system of Phung et al. with the disengagement option of Blaney in order to prevent unwanted acceleration of the vehicle in an emergency situation.

Art Unit: 3618

With respect to claims 2-5, the control system of Phung et al. and Blaney can be applied to any type of vehicle, further, type of vehicle the system is applied to is an intended use and therefore has been given little patentable weight.

With respect to claim 17, the method recited in this claim is inherently performed in the use of the control system of Phung et al. and Blaney, as described above.

Response to Arguments

4. Applicant's arguments filed 6/27/03 have been fully considered but they are not persuasive. In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In this case, the Phung et al. reference seems perform the same function as the present invention only taking it a step further and applying torque in response to lateral acceleration, rather than simply shutting off the cruise control. The Blaney reference was applied only to demonstrate that it is well-known in the art to shut off the cruise control in response to any number of vehicle parameters, such as lateral acceleration or braking, etc. For these reasons the rejection stands.

Art Unit: 3618

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
